DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 21 – 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al. (U. S. patent 5,864,178).
4. In re claim 21, Yamada, in the U. S. patent 5,864,178; figures 1 – 79 and related text, discloses fabricating a semiconductor substrate 201 which includes a semiconductor integrated circuit and an electrode 203, which is composed of a base member of insulating material 204 on the semiconductor integrated circuit and a conductive layer 203 formed on the surface of the base member (figure 56A); placing the semiconductor substrate to face a connection substrate 202 (figure 56A); connecting the electrode to the connection substrate (figure 56B); supplying a seal

member in the space between the semiconductor substrate and the connection substrate (figures 56D – 57).

5. In re claim 22, Yamada discloses wherein the semiconductor substrate is placed to face the connection substrate according to a face down technique (flip-chip technique) (figures 56A – 57).

6. In re claim 23, Yamada discloses wherein the base member and the seal member are made of the same material (column 56).

Conclusion

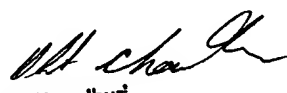

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fernando Toledo whose telephone number is 703-305-0567. The examiner can normally be reached on Mon-Fri 8am to 4pm.
